

Challenge 2: Rambo's Roman

Rambo is a beginner in freelancing . He got his first freelance project from a company called ROMAN. His job there is to convert numbers into their Roman form. But today is his girlfriend's birthday and he want to spend some extra time with her but can not leave the desk until he completes his work. Help Rambo in the conversion process by creating program to make his job easier, so that he can go to his girl asap.

Input constraints:

K-> no of test cases

n-> number to be converted

Output constraints:

K lines representing the equivalent Roman form

TestCases:

INPUT 1

```
4
45
651
2000
854
```
